

Who We Are

HJF fulfills its mission to advance military medicine by partnering with the military, government, academia, and industry. Focused solely on military medicine in support of the warfighter, HJF was established as a nonprofit organization to perform this work through scientific, administrative, and program management services that deliver resources investigators and clinicians need to find solutions and drive innovation.

HJF is named after the late U.S. senator who sponsored the legislation leading to its authorization by Congress in 1983.
